Client communication

English and Spanish

Professional Summary

Computer Science graduate and software developer with hands-on experience building production web applications for real clients. Combines technical problem solving with 15+ years of professional experience, including 10+ years leading teams in high-pressure operations.

Professional Experience

Freelance Software Developer, Independent

2026 - Present

- Translate client needs into functional features, deploy releases, and maintain production web applications.
- Built LDJohn.com with a responsive interface, event and gallery management, and authenticated administrative tools.

Surveyor, Operating Engineers Local 12

2018 - 2020

- Completed construction layout and topographic surveys with careful attention to measurements, deadlines, and field conditions.

Hub Supervisor, United Parcel Service

2005 - 2016

- Led and coached teams of up to 10 employees while maintaining production, safety, and quality standards.
- Trained new hires, resolved conflict, improved performance, and enforced accountability in a high-volume operation.

Selected Projects

LDJohn.com

Production Flask website with responsive design, content management, and client-facing deployment.

Codecracker

Python and Flask authentication lab covering hashing, bcrypt, login protection, and persistent user data.

AI Sentinel

Flask-based AI chat prototype with OpenAI API integration, secure environment variables, and a responsive interface.
